

Folding Trailer Components

Folding Trailer Instructions

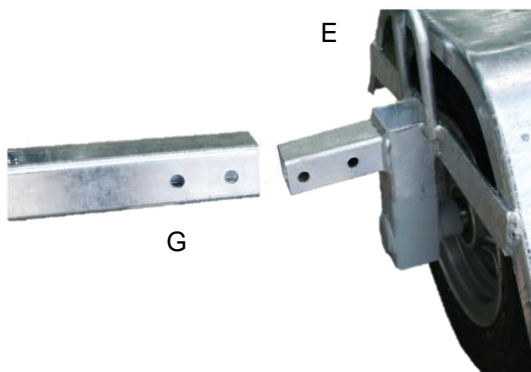

Step 1

Assemble the frame: Using the mounting plates, and the nuts & bolts provided, attach the pieces together following the above diagram.

Parts Required: A, B, C, F and G.

Step 2

Attach the Wheel & Guard Assembly to the trailer frame.
NOTE: There is a Left Hand & Right Hand side version.
Parts Required: E & G

Step 3

Attach the winch carrier, rollers & brackets, skids, slide bracket legs, vin plate, and stickers to the trailer. Attach the lightboard to the boat.
Parts Required: D, H, I, J, K, L, M & O.

The Folding trailer is designed specifically for short trips at reduced speeds on paved roads. Speeds should be maintained at 60KMH or less and trip distance should be limited to less than 25 km in any one leg. If trip distance exceeds this we recommend a full size trailer be considered. We strongly encourage you to consider this when planning your journey.
